

# WHY CHOOSE CARINGEDGE

## OUTPATIENT THERAPY

Experience the ultimate continuum of care by adding CaringEdge to your daily routine!

It's our goal to do all we can to help prevent, slow, and reverse declines by offering specialized therapeutic measures that focus on regained independence and abilities.

Our staff is specialized and has enhanced their clinical training to address the needs of the aging population, utilizing appropriate treatment strategies and tools that help patients thrive, not just survive.

- *We use evidence-based practice and individualized treatment plans to help post-surgical patients following total joint replacements, spinal surgery, and other general surgery procedures to return to their abilities.*
- *Our standardized outcomes are measurable for every patient to track progress and set appropriate goals.*
- *We use high-level balance training that incorporates cognitive training and dual-tasking.*
- *Using appropriately dosed strength training helps create true physiologic muscle changes and improves mobility, pain, and safety.*

■ Medicare, Medicaid & private insurance accepted
